

Multi-Safe daytime safe

Safety kit

Product characteristics of Multi-Safe at a glance

Application advantages

- Storage of hard cash and rolled money, cheques, keys or items of value
- Time lag times and arbitrary drawer allocation
- Adjustable levels for the bank-note drawer with a lockable cash box
- Acoustic and visual display
- Integrated emergency power supply
- Complies with directives of UVV-cash offices

Optional

- 24 hours CEN III safety deposit box
- Alarm release via alarm code
- Alarm release if drawers are prised open
- Variable arrangement of drawers
- Biometrical identification (fingerprint)

Multi-Safe daytime safe

Safety kit

Multi-Safe is the ideal complementary product to our Direkt-Safe TCM.

The daytime safe is particularly suitable for the storage of hard cash and rolled money, cheques, foreign currencies, keys or cheque cards. Safety is also in this case very important for us: The drawers are released after the expiration of the time delay and unlock by a short tap. An arbitrary PIN can be assigned to up to 12 users. Additional protection is provided by the cylinder lock of the banknote drawer. This tray is only released if a deposit insertion into the four shafts of the prescreening drawer is allowed. A complete release only occurs following a code input, after the UVV-locking time. By sliding the drawers together, they relock automatically.

The safe is equipped with an emergency power supply. So we guarantee the contents' ongoing availability.

Every user is able to design his or her individual storage system with drawers in four different sizes. The drawers' equipment is able to be totally modified according to your requirements.

Integrated in a 24-hour-deposit box, according to CEN III, Multi-Safe stores your items of value – even after hours. It complies with all directives of the "Verband der deutschen Sachversicherer" (Association of German Property Insurer).

Dimensions and weight

External sizes Multi-Safe:

- 400 x 680 x 573 mm (w x h x d)
- 90 kg

Safety deposit box:

- 879 x 800 x 870 mm (external)
- 430 x 700 x 670 mm (internal)
- 560 kg (incl. safety deposit box)

Technical modification may arise due to Research and Development. Depending on the equipment, dimensions and weight may vary. Date: March 2004.
